Sharing Policy

The Children's Online Privacy Protection Act (COPPA) is a federal law governing the online collection of personal information from children under 13. The rules spell out what a website operator must include in a privacy policy, when and how to seek verifiable consent from a parent and what responsibilities an operator has to protect children's privacy and safety online. The Laveen Elementary School District utilizes several educational software applications and web-based services that are operated by third parties. In order for students to use these valuable programs and services, certain personal information, generally, the students' name and a username and/or email address, must be provided to the website operator. Under federal law, these websites must provide parental consent before collecting personal information from children under the age of 13. The law permits schools to consent to the collection of personal information on behalf of all of its students, eliminating the need for individual parental consent given directly to the website operator. A list of websites that may be used in District classrooms, with links to their privacy policies and terms of service is available on the Laveen School District website at laveeneld.org. By agreeing to this AUA, you agree to allow the Laveen Elementary School District to release your child's personal information for the purpose of accessing educational media and web-based services utilized by the District.

Collaborating and sharing creative content is an encouraged practice for all LESD students. Students will be participating in project-based learning and may create content such as electronic presentations, blogs, podcasts, videos, wikis, and other social media. The meaningful step in the process is sharing their content with other classes, and the school community and, at times the world. LESD uses district websites, Google Apps, and other moderated sites to share school and student work. These are district moderated sites, where students can collaborate online with teacher supervision.
